REAL Cookies Are the REAL Deal

They have finally arrived; a delicious and healthy cookie that tastes like the real thing for those with or without dietary restrictions or allergies.

REAL Cookies started with two longtime friends, Lauren Berger and Marla Felton. Their families' food sensitivities and their own changing dietary needs led them to experiment with creating the most delicious, healthy cookie, made with real, clean ingredients.

The cookies are created from the finest, non-GMO ingredients and are gluten-free, grain-free, dairy-free, vegan, kosher, and paleo-friendly. They are sweetened with pure Vermont maple syrup, never with granulated, refined, or white sugar—something learned from Lauren's grandfather, a forefather in the field of functional medicine.

REAL Cookies come in various mouth-watering flavors: Chocolate Chip, Peanut Butter Chocolate Chip, and Lemon Blueberry.

These new-age cookies are delectable any time; whether at breakfast or lunch, as a dessert, snack, during or after hiking, yoga, running, and everything in between. It's a cookie for adults, kids, and grandparents. ★ *REAL Cookies can be purchased online and will be available in retail stores in the fall. A 2-pack sampler of all three flavors is also available at realcookiesco.com.*
